

LICENSING AND CLOUD HOSTING OPTIONS

Providing Property Management Solutions for Over 25 Years

The Professional Landlord™ Licensing and Cloud Hosting Options

License

A license confers a perpetual right to install and use The Professional Landlord™ to manage properties in a single database. The license is non-transferable and only applies to the version of the product available at the time of purchase. Licenses include 6 months of subscription benefits (see below).

Subscription

A product subscription extends a license to any new releases of The Professional Landlord™ that become available during the subscription term. In addition to download rights to all new releases of the product during the subscription term, other benefits include up to 12 ½ hours of no cost telephone and email support, discounts on The Landlord Inspector, access to PROMAS Academy and other online training materials, and more.

Subscriptions must be renewed within 30 days of the expiration of subscription benefits.

Update

An update extends a license to the current version of the product. Updates include six months of subscription benefits (see above).

Cloud Hosting

Cloud hosting allows The Professional Landlord™ to be accessed through a browser or app on most Apple, Android, and Windows devices.

Customers may lease a license for The Professional Landlord™ for cloud hosting without the need to purchase a license.

Cloud hosting is \$30 per user per month for customers with an active subscription or a leased license. Cloud hosting includes one GB of storage space for each hosted user. Additional storage is available for \$2 per GB per month if needed. The cloud hosting service has a one-time setup fee equivalent to the first month's service and a one year minimum term.
