

SUBSCRIPTIONS AND UPDATES

Providing Property Management Solutions for Over 25 Years

Subscription is an annual renewable agreement that includes access to the latest releases of The Professional Landlord™ and many additional benefits. **To avoid interruption of technical support services, annual subscriptions should be renewed by the expiration date.** An update purchase may be required for users who do not renew and maintain current subscription.

An **Update** is a one-time purchase of a license to use the latest release of The Professional Landlord™. It is available to customers with a license to an older version of the same product. **Updates include an annual subscription.**

License sizes may be increased without a requirement to purchase the latest version of the software.

We are constantly improving our software based on customer feedback and to help our customers comply with changing federal, state, and local regulations. An annual subscription is the most economical way to keep your software current and to benefit from the latest product features and enhancements. Customers who would like to take advantage of the benefits of a subscription but have let their subscription lapse must purchase a product update to re-enroll in the subscription program.

By renewing your subscription you can enjoy these great benefits:

- ▶ **Save money.** For most customers the cost of an annual subscription is half the cost of purchasing an update.
- ▶ **Save when you grow.** Subscribers receive a 50% discount when increasing the size of a license.
- ▶ **Subscriber downloads.** Keep current with access to all software updates and new major releases.
- ▶ **Technical Support.** Up to 12 ½ hours of no cost one-on-one phone and email support with our software support staff. The full support policy is available on our website www.promas.com.
- ▶ **Annual checkup.** A complementary review of your records is available on request during the first month of your subscription renewal.
- ▶ **Tax filing.** The IRS electronic filing format changes annually and the paper forms are redesigned from time to time. Subscribers don't need to worry about the potential expense of purchasing an update to comply with new IRS regulations because they have access to all the latest releases.
